

QUALITY • COMMITMENT • CONSISTENCY

Manufacturing Quality Products

The Kapal Difference

Planning a remodel or other building project can be a daunting task. There are many things to consider including budget, style and timeframes. That's why we started a renaissance of our own right here in South Texas. Since 2008, Kapal has been proud to offer timely service, quality products and complete installation for the state of Texas and surrounding areas.

We believe that style is more than just aesthetics, so we work hard to turn your vision into a reality. In 2008 we built our first production plant with 10,000 square feet of space, later in 2011 the manufacturing space increased to 20,000 square feet. Kapal continued to grow and in 2014 expanded the granite and quartz business for a total of 40,000 square feet facilities to better provide you with outstanding service and superior products that work best with your budget and timeframe. In 2017 Kapal setup the most sophisticated state-of-the-art facility to fabricate stone countertops in granite, quartz, and solid surface right next to our cabinetry plant. Kapal now have a total of 60,000 square feet manufacturing facility to better serve our customers.

Whether your style is contemporary or classic, we believe you are the driving force of your own definitive creative vision. We are proud to be one of the first turnkey manufacture that provide cabinets and countertops with a short lead time, installing the same day with our own professional installations crew. To offer you the confidence in knowing that your project is being handled with a superior level of professional and craftsmanship from conception to completion.
